

Defibrillator options

Sudden Cardiac Arrest (SCA) is one of the leading causes of death in the United States, striking more than 340,000 victims each year. The current national survival rate for SCA is less than five percent. The likelihood of successful resuscitation decreases by about 10% with every minute that passes. An additional 40,000 lives could be saved each year in the U.S. alone with widespread access to defibrillators.

AED Trainer

HeartStart Trainer

HeartStart Trainer

Product #M5085A

Price \$360.00

CPR and first aid instructors can help empower their students with awareness of HeartStart Defibrillators and how to use them to save lives. The HeartStart Trainer simulates how you will operate during a real-life sudden cardiac arrest event. Clear, confident voice instructions provide easy-to-follow directions and eight pre-configured scenarios to make training easy and more rewarding. The trainer is visibly different to avoid inadvertent use in an emergency. The HeartStart Trainer comes with a nylon carrying case, one reusable Adult Training Pads Cartridge (M5073A) and one External Manikin adapter.
